

We are a family farm business developed in 2002 by husband and wife team, Will & Genevieve. Originally started with plans for a U-Pick fruit farm, we have expanded into agriculture tourism via the Corn Maze. Our objective is to develop a business that will produce enough income to send our two kids to college/university and ourselves a fun retirement.

With the development of commercially viable Saskatoon and Sour Cherry cultivars, we expanded into commercial production of these fruits crops. Honeyberries (Hascap), apples, strawberries and raspberries have also been planted to provide a variety of fruits for picking.

We invite you to come out and spend some pleasurable time with your children or partner picking fruit or just walking through the Corn Maze. New themes are being planned for each year of the corn maze. We are anticipating U-Pick production levels on our strawberries and raspberries for 2007 and look forward to having you out for Berries and Maze treks.

Best Regards: Genevieve & Will  
Kaelum & Athena
